

FOR THE BATH

Nectarine offers a variety of products for bathing which pamper normal to dry skin while cleansing gently. Most items may be custom scented with our line of over 100 fragrant Perfume and Natural Essential Oils. All skin types will enjoy the benefits of our bath line.

Our Foaming Bath Gels, Exfoliating Body Wash and Bubble Baths all contain mild coconut oil-derived surfactants as well as moisturizing skin-softeners to create a luxurious bathing experience. Rich in lather, these surfactants cleanse effectively without drying the skin.

For after bath care, Nectarine offers the extra moisturizing benefits of Almond Skin Oil, a water dispersible blend of natural oils, which may be added to a tub of bath water or smoothed over wet skin after bathing. Also our Vitamin E Revitalizing Hydrator Spray is a wonderful after shower or bath body splash which keeps skin toned, hydrated and refreshed while uplifting the spirit.
