

MOISTURE CREAMS

Nectarine's Moisture Creams are rich, concentrated emulsion formulas. Their thick consistency makes them ideal for specific areas such as the face, hands and delicate eye area.

Our Moisture Creams are formulated with natural, soothing and nourishing ingredients such as vitamins, botanicals and vegetable emollients, which effectively moisturize all skin types. In addition, some of our creams may contain lanolin and/or mineral oil, both of which are excellent emollients with a long history of efficacy and safety. Our Moisture Creams are unscented because many customers prefer to use fragrance-free products on their face. We recommend that you not custom scent creams or any facial product.

Customers frequently inquire about the use of animal testing, especially in this product category. You may be confident that we do not participate in animal testing and have always maintained the highest standards of safety and cleanliness.
